

over
200
exhibitors

On 12-14 March 2010 in Szczecin BUD-GRYF SZCZECIN, the 19th International Fair of Building will be held on the premises of the International Szczecin Fairs. The event is organised in parallel with ENERGIA, the 14th Conventional and Renewable Energy Fair. **They both comprise the largest fair in the civil engineering and energy sectors in North-West Poland.** The fair is a meeting venue for representatives of civil engineering and energy sectors, including manufacturers, merchandisers, architects, service providers, developers and investors, as well as individual clients looking for new technologies, materials and solutions.

Sector related conferences attract representatives of local governments responsible for the development in the field of energy in the North-West Poland.
